PROJECTS

Personal Portfolio Website : Developed a full-stack MERN portfolio application featuring a responsive React.js frontend, reusable components, smooth animations, and React Router-based navigation. Implemented a Node.js and Express.js backend with MongoDB integration to manage dynamic project data and handle contact form submissions via RESTful APIs. Deployed the application with a production-ready setup, ensuring scalability, performance optimization, and real-world usability.

Online Hotel Reservation Platform (MERN Stack) : Developed a full-stack hotel booking application using MongoDB, Express.js, React.js, and Node.js, implementing user authentication and role-based access, dynamic hotel and room listings with search, filters, and availability management, a secure booking workflow, an admin panel for hotel and room management, RESTful APIs for backend operations, and a responsive, interactive UI with Tailwind CSS, ensuring seamless user experience across devices while incorporating form validation, error handling, and real-time data updates.
